This educational program is for people with a higher medical education. It's aimed at training highly qualified specialists in the field of Roentgenology for self-dependent work in healthcare agencies and facilities as well as private practice.

Program duration – two years.

The educational process is practically oriented and is aimed at forming systematic knowledge and professional competencies. A lot of attention is given to practical preparation, for mastering high-tech methods of performing roentgenological diagnostics of diseases.

Program staffing: doctors and candidates of sciences, leading specialists in medical organizations.

Features of implementation: clinics with high-tech equipment, use of interactive teaching technologies, use of multimedia equipment and internet communications.

Program graduates have the possibility to freely design their professional career, including continuing their studies for a Ph.D. degree.
