Programme curator: **Yurii Markadanov**
Tel.: **88142711079**
E-mail: markadanov@psu.karelia.ru

The education program is aimed at building knowledge and competence both in subjects directly related to the industry and information technologies that assist its regulation.

The education program includes courses on studying and implementing the most common industrial programs for calculation and design of buildings, as well as the programs for enduring operation and management efficiency at construction enterprises. Besides, special attention is paid to the specificities of the North-Western region of Russia, such as long winters, peculiar soil conditions, ecological programs, potential use of local construction materials.

The program is structured in a way that practically all basic courses are read by the beginning of the fourth term, which gives a student an opportunity to make a decision on the specialty and make up an individual study plan by the end of the third term.
