# Exploitation of Transport Technological Machines and Complexes

National Research ITMO University

Degree or qualification is awarded: **B.S. in Maintenance of Transport, Technological Machines and Complexes**

Language of study: **Russian**
Mode of study: **full-time**
Duration: **4 years**
Availability of free education: **yes**
Price: **246 000 RUB per year**

Programme webpage at the university website:
https://en.itmo.ru/en/program/184/Information%20Security%20Technologies.htm

Programme curator: **Daria Shved**
Tel.:
E-mail: dvshved@itmo.ru

Includes sciences and technology related to the operation, repair and servicing of vehicles and transport and transport – technological machines for different purposes, their units, systems and elements.

## Specializations within this programme

**Information Security Technologies**

**Program description**

The program is aimed at training professionals capable of working in the most interesting positions in the field of information security, such as information security specialist, virus analyst, functional security engineer, information security developer and many others. Our graduates conduct the development, introduction, and implementation of information security systems on all levels, as well as develop new and promising technologies for ensuring cybersecurity. The studies are implemented with a practice-oriented approach. Students work with industry-based lecturers who transfer their experience of solving real-life tasks, which makes it significantly easier for our graduates to find employment and makes them highly sought-after on the job market.
