The program is aimed to provide training in the field of ecology, nature and environmental protection, in order to let students get relevant qualifications that meet the needs of the regional system of nature protection and nature management.

Graduates are in demand on the domestic and international labor market and meet the requirements of modern times.

You will receive the necessary knowledge and skills for comprehensive analysis of global and regional geo-environmental problems using modern methods: GIS technologies, design, development and calculation of graphic projects.

You will become competitive in the field of project development and geo-environmental monitoring of the EIA (environmental impact assessment), and will work with environmental documentation in the field of industrial production.
