

Metallurgy of Non-Ferrous Metals

Siberian Federal University

Degree or qualification is awarded: **Master of Science (Metallurgy)**

Language of study: **English**

Mode of study: **full-time**

Duration: **2 years**

Availability of free education: **no**

Price: **3000 Euro per year**

Programme webpage at the university website: <http://www.sfu-kras.ru/en/masters/aluminium-tech#tab1>

Programme curator: **Natalya V. Belousova**

Tel.: **+73912063654**

E-mail: NBelousova@sfu-kras.ru

The program is developed to provide students with in-depth knowledge and understanding of extractive metallurgy of non-ferrous metals. Objectives The objectives of the program are to give a fundamental understanding of the principles of extractive metallurgy, to develop practical skills that are required for a future professional career and to prepare graduates to work effectively as members of professional team and to continue their education through advanced trainings. Learning outcomes On completion of this program, it is expected that students will be able to: derive and apply solutions from theoretical knowledge of metallurgical processes; formulate and solve engineering problems; evaluate engineering solutions from the standpoint of product quality and environmental protection; communicate effectively.

Specializations within this programme
