

Mechanical Engineering

Siberian Federal University

Degree or qualification is awarded: **B.Eng. Mechanical Engineering**

Language of study: **Russian**

Mode of study: **full-time**

Duration: **4 years**

Availability of free education: **no**

Price:

This program provides the choice to specialize either in «Equipment and technology of welding production» or «Machines and technology of metal forming». A wide range of potential careers will be open to successful graduates from our program. These include highly requested professions in mechanical engineering, repair and maintenance of oil and gas pipelines, mining equipment, metallurgical equipment and other complex technical systems.

Unique characteristics:

The program is designed to provide students with theoretical grounds and practical skills in specialist engineering subjects, such as welding techniques, resistance spot welding with reduction of spot weld periphery, one-sided spot welding. The majority of our graduates pursue careers within mechanical engineering specialists.
