This program provides students with the most relevant, practical, and applicable knowledge available in software engineering and software management. With the appropriate mix of technical and business skills, graduates of this program can systematically analyze business situations and propose, plan, and manage rigorous software development strategies and efforts to fulfill organizational objectives.

Since this program focuses on both technical and development management issues, graduates of this program can apply the acquired skills and knowledge to advance their careers in software architecture, strategic software business planning, and project portfolio and program management jobs. It can also advance more experienced software engineers and project managers to pursue technical leadership roles in the modern software business.

Specializations within this programme
