

# Strategic and Spatial Planning

Immanuel Kant Baltic Federal University

Degree or qualification is awarded: **Master**

Language of study: **Russian**

Mode of study: **full-time**

Duration: **2 years**

Availability of free education: **yes**

Price: **2 400 USD per year**

During the course of studies, you will learn everything about the fundamental problems of sustainable development at global, regional and local levels, as well as about the specifics of innovative development of the leading countries of the world and Russian region. You will also study the specifics of the way coastal and border regions function, as well as the regional economics and management of socioeconomic processes within the country, federation subjects and other entities with the features of established industries, and territorial structure of the economy, as well as intra-regional, inter-regional and inter-state relations.

You will be able to find optimal solutions to strategic challenges at the regional and municipal levels of government and to build urban strategy urban districts, based on the principles of sustainable development thanks to the knowledge of the rational territorial organization of the largest urban agglomerations on the basis of integrating socio-geographic, geographic, environmental, geographical, architectural and technical factors and conditions. In this course, you will also learn how to collect and process statistical information and use GIS in spatial planning tasks.
