Training is aimed at familiarizing students with modern methods of reconstruction and presentation of the past in the computer environment and media space; management of information and media support of historical and cultural projects.

Complex of philosophical and social courses, modern information and bibliographic systems and Internet resources used for historical research, media and digital technology used in museum work, 3D-reconstruction of objects of historical and cultural heritage, geographic information systems in historical research – are being studied within the program.

Theoretical knowledge gained is further implemented during internship periods: research, pedagogical, and pre-diploma. Most lecturers hold doctorate degrees or PhDs. The graduates can carry out research, expertise and pedagogical work, or take further post-graduate courses.
