

Electronics and Nanoelectronics (Bachelor)

Saint Petersburg Electrotechnical University "LETI"

Degree or qualification is awarded: **Bachelor**

Language of study: **Russian**

Mode of study: **full-time**

Duration: **4 years**

Availability of free education: **yes**

Price: **190 000 - 199 000 rubles per year**

Programme webpage at the university website:

Programme curator: **Maria Titarenko**

Tel.: **+7 812 234-35-53**

E-mail: mytitarenko@etu.ru

About training

Graduates of the program are researchers and developers proficient in nanotechnology, micro- and nanosystems; electronics of ultrahigh frequencies; optical and quantum electronics; electronic devices and devices for monitoring, control and diagnostics; ion-plasma processes.

Key points

- The program conducts advanced science training and aims for developing student's creative abilities. Most of our graduates are scientists, engineers, businessmen, some are musicians and poets, - and one of them is a Nobel Prize winner;
- High-tech equipment and modern information technologies to help the training;
- Students can take internships in leading Russian and international companies and St. Petersburg-based enterprises.

Departments

After their 2nd year students can choose their major for further studies:

- Electronic Devices;
- Microelectronics and Solid State Electronics;
- Microwave Electronics;
- Nanotechnology in Electronics;
- Physical Electronics;

- Quantum and Optical Electronics.

Specializations within this programme

Circuit Design

Solid State Physics

Materials and Elements of Electronic Engineering

Microwave Electronics

Solid State Electronics

X-ray Technology

Theoretical Foundations of Electrical Engineering

Methods of Mathematical Physics

Quantum and Optical Electronics

Vacuum and Plasma Electronics
