This educational program is for people with a higher medical education. It's aimed at training highly qualified specialists in the field of General Practice (Family Medicine) for self-dependent work in healthcare agencies and facilities as well as private practice.

Program duration – two years.

The educational process is practically oriented and is aimed at forming systematic knowledge and professional competencies. A lot of attention is given to clinical preparation, for mastering high-tech methods of diagnostics and treatment of diseases.

**Program staffing:** doctors and candidates of sciences, leading specialists in medical organizations.

**Features of implementation:** clinics with high-tech equipment, use of interactive teaching technologies, use of multimedia equipment and internet communications.

Program graduates have the possibility to freely design their professional career, including continuing their studies for a Ph.D. degree.
