The education program is designed to train highly qualified specialists working in research, industrial and technological, organization and management, and education.

The first part of the program includes courses on the contemporary issues of mathematical analysis, topology, data analysis and application of mathematics in insurance, Internet technologies and other areas. The second part of the program is research and educational work under the guidance of one of the leading instructors of the Faculty.

Upon completion of the program the graduates become specialists with fundamental knowledge of mathematics, who know the methods of mathematical modeling and can use modern computers and software in order to find effective solutions to various general scientific, management and applied problems.
