The education program is aimed at forming a system of cultural and professional competences and training accomplished graduates to work in education. The Bachelors study education, training, development, educational systems. The program prepares the students for educational, cultural and research activities.

The interactive forms of education with more active, participatory approach are widely used in the program, and together with project work, further develops the required professional skills of the students. Besides, the future Bachelors meet with the representatives of educational institutions, research, state and public organizations, take part in workshops held by experts and specialists.

The students have the ability to modify the program and take elective course, so they can specialize in elementary education, preschool education, technological education, or physical education.
