The goal of this program is to produce world-class statistical economists who possess the ability to use creative and analytical thinking to make optimal administrative decisions in economics, business, and the social sphere. Department of Statistics and Data Analysis graduated its first class of undergraduates in 2012. Our graduates' receive solid preparation in economic theory and mathematics, foreign languages, international social research methods, the theory and practice of statistical analysis, econometric modeling and forecasting. Students gain experience modeling real social and economic phenomena and processes using modern information technologies and leading software. The program collaborates with prominent international organizations in the field of statistics, as well as universities and research institutes in France, the USA, Germany, and Russia.
