The programme prepares students for careers as research linguists. They may also find jobs as experts or consultants capable of utilizing digital tools for text analysis. These skills, in combination with traditional methods of linguistic investigation, means that graduates can analyze texts in any language and of any volume, thereby ensuring the best solutions for applied tasks in business and interdisciplinary research. In addition, graduates may work in education and R&D as well as in public and private institutions dealing with text analytics, IT security, advertising consultancy, and marketing.

Specializations within this programme
