This an exclusive programme focused on preparing top and middle managers in organisations and institutions, industrial and trading companies, as well as logistics providers, working in strategic logistics, supply chain management, expertise, design and management of logistics infrastructure.

Graduates of the Programme will acquire unique competencies in expertise, design, and the operation of such macroeconomic objects as industrial parks, logistics and industrial clusters, logistics technology parks, and centres of different levels and purposes. The Master's in logistics focuses on integrating and synchronizing plans in client supply chains, creating a unified information platform, which helps to manage the problems of inter-functional and in inter-organisational logistics coordination, integrated supply management, cooperation and communication among the logistics contractors.
