

# Research internships in Life science (chemistry, biology)

Novosibirsk State University

Language of study: **Russian, English, French**

Mode of study:

Duration: **1-6 month**

Availability of free education: **yes**

Price:

Programme webpage at the university website: <https://english.nsu.ru/admission/programs/internships/>

Programme curator: **Yana Antonova**

Tel.: **+7-383-3634292**

E-mail: [interstudy@nsu.ru](mailto:interstudy@nsu.ru)

A research internship is an unique opportunity to conduct research projects in the heart of the Siberian science center under the supervision of NSU professors, who are world renowned scientists and researchers. The main feature of a research internship at NSU is its interdisciplinary approach. Specialists in biology, physics, mathematics, geology, archaeology, and chemistry work close to each other in the 35 research institutes of the Siberian Branch of the Russian Academy of Sciences in Akademgorodok. R&D institutes specialized in multiple scientific fields are clustered together on a relatively small territory.

## **Specializations within this programme**
