

Fundamental Chemistry

Far Eastern Federal University

Degree or qualification is awarded: **Master**

Language of study: **Russian**

Mode of study: **full-time**

Duration: **2 years**

Availability of free education: **yes**

Price: **290 000 rubles per year**

Programme webpage at the university website: <https://www.dvfu.ru/admission/program-m/04.04.01.php>

Programme curator: **Artem Grachev**

Basic Chemical Research of Substances and Materials

Objectives of the program:

Training of highly qualified specialists who are competent in modern methods of synthesis and research of substances and materials for various purposes, capable to participate in studies of chemical processes in nature and carried out in laboratory conditions, identifying common patterns of their occurrence and the ability to control them

Training of specialists ready for pedagogical activity at the departments of the chemistry of universities of chemical and non-chemical profile for the management of scientific and pedagogical teams.

Training of specialists capable of solving complex tasks in research, organizational, managerial and pedagogical fields of activity related to the use of chemical phenomena and processes.

Description of the target audience of the program: the program is developed for graduates of undergraduate degrees in chemistry, chemical technology, ecology, and others.

Graduates of the Master's program are trained for research activities in research and development institutions. They are competent to teach in various educational institutions of chemical or technical profiles.
