The mission of the master's program "Investment Engineering": innovative development of the region through the creation of a system of technological entrepreneurship, promotion of new technologies, and the introduction of project management.

The purpose of the educational program is to form a new category of technological entrepreneurs with professional competencies in the field of project management: those who are able to create their own business based on new technological developments.

The area of the professional activity of graduates who have mastered the master's program includes:

- innovative development of the country, regions, territories, industries, and enterprises;
- development of infrastructure and introduction of new technologies;
- informational, technological, regulatory, financial support of innovative activities;
- innovation as a field of scientific and technical activity
- innovative solutions in the field of higher and special professional education;
- introduction of innovative means and methods in the activities of state authorities and administration of the federal, regional, and municipal levels, objects of small and medium-sized innovative businesses.
