The educational program is aimed at training highly qualified specialists in the field of integrated formation of the urban environment and architectural design. Promotes the formation of a culture of designing the architectural environment of cities, taking into account the specifics of the Far Eastern region as well as practical and creative skills of using tools in the design of various objects of exterior and interior subject-spatial content of the architectural environment.

The architect-designer explores and designs a harmonious, comfortable and safe urban environment and its subject-spatial components, including in extreme conditions of the natural environment, space and planets of the solar system. Develops complex projects of residential and public buildings, tourist and recreational and sports facilities, cultural and industrial centers. Designs landscape and recreational complexes, interiors of buildings and structures, urban visual, navigation and information and communication systems. Designs the light-color organization of urban public spaces and tourist and recreational areas.

Key disciplines of the program:

Architectural design, analytical drawing, painting and coloristics, fundamentals of the theory of complex formation of architectural environment design, fundamentals of shaping and compositional modeling in architectural design, history of urbanism, architecture and design of architectural environment.
