The objects of professional activity of graduates are: biological systems of various levels of organization; processes of their vital activity and evolution; biological, bioengineering, biomedical, environmental technologies, biological expertise and monitoring, assessment and restoration of territorial bioresources.

Profiles:

Biology: The program combines the classical fundamental base and unique special courses in current areas in biology. You will study with well-known professors and associate professors of biology in Russia and abroad. The achievements of Far Eastern scientists and unique research methods are at the heart of the program. You will have a unique practice in the region: study the bioresources and biodiversity of the Far Eastern taiga and the Far Eastern seas. You will be able to study in the park of high-tech equipment and at your own marine biological station FEFU - MBS "Zapovednoye", located in the ecological zone
