Specializations within this programme

State and Municipal Management System

State and Municipal Management (System of State Municipal Management)

The aim of the program is to train professionals for the state and municipal government, institutions and organizations of the public sector who have professional knowledge related to applying modern technologies to solve social, innovative, environmental, financial efficiency problems at the federal, regional and local levels.

The program is focused on the following activities: administrative and technological, research and teaching, organizational and managerial.

The distinctive feature of the program is the unity of economic, managerial and legal approaches in teaching. The uniqueness of the program lies in the teaching of disciplines by leading experts and government officials who occupy leadership positions in state and municipal authorities in the Russian Federation.
