Automation System Development and Implementation

National University of Science and Technology MISIS

Language of study: **Russian**
Mode of study: **full-time**
Duration: **2 years**
Availability of free education: **yes**
Price: **204 800 rubles/year**

Programme curator: **Galina Shapkarina**
Tel.: **+7 499 230-26-33**
E-mail: shgg5@yandex.ru

Program Summary (up to 500 characters) The program is intended to prepare skilled professionals capable to determine and analyze automation system design problems and develop system programs and measures to promote implementation of such systems. The program provides training of R&D skills for the development of technical and software tools for specific automation systems. During the course, the students gain practical experience using methods to solve automation system design tasks for existing production facilities.

Specializations within this programme

Master in Automation System Development and Implementation
