

Computer Science and Control in Technical Systems

National University of Science and Technology MISIS

Language of study: **Russian**

Mode of study: **full-time**

Duration: **2 years**

Availability of free education: **yes**

Price: **234 000 rubles\per year**

Programme curator: **Alexander Zagorodny**

Tel.: **+7 499 230-26-33**

E-mail: tavolganz@mail.ru

The program focuses on advanced methods for analyzing and designing of automatic control systems, and software and hardware for the automated design of instruments and control systems. Graduates may work in the capacity of researchers and engineers, develop automated systems for production processes and facilities, compile mathematical models, create optimal algorithms for regulators and program controllers, perform research feasibility studies, prepare documentation and test instruments and systems.

Specializations within this programme

Master in Computer Science and Technical System Control
