Intelligent Systems for Data Processing

National University of Science and Technology MISIS

Degree or qualification is awarded: **Bachelor's Diploma in Informatics and Computer Science**

Language of study: **Russian**
Mode of study: **full-time**
Duration: **4 years**
Availability of free education: **yes**
Price: **228 000 rubles/year**

Programme webpage at the university website:

Programme curator: **Igor Temkin**
Tel.: **+7 (495) 638-44-74 (044-74)**
E-mail: itasu@misis.ru, welcome@misis.ru

The program is directly related to Data Science and trains modern specialists who will be in demand in the era of digital economy, robotization of production and services and ubiquitous artificial intelligence technologies. Within this program, students acquire competencies in the field of computer science and network technologies, cloud systems, regression analysis and neural networks, intelligent systems and machine learning algorithms in order to create and develop "smart cities", as well as to implement digital production in all industries.

You will be able to work as:
- business-analyst;
- system analyst;
- consultant in information systems application;
- project manager.

Specializations within this programme
