

Radiophysics

National Research Lobachevsky State University of Nizhni Novgorod (Lobachevsky University)

Language of study: **Russian**

Mode of study: **full-time**

Duration: **4 years**

Availability of free education: **yes**

Price: **144 000 RUB per year**

Programme webpage at the university website: <http://www.rf.unn.ru/courses/radiofizika-2/>

Studying at the radiophysics faculty of Lobachevsky University you will receive a classical education with a wide range of profiles from radio astronomy and laser physics to telecommunication technologies.

Modern radiophysics is an original scientific method for studying various phenomena of nature, a universal view of the world as a combination of vibrational and wave processes.

At present, specialists in radiophysics have the widest choice among the most relevant fields of science and science-intensive business, among which are as popular as wireless digital communications, nanostructure physics, neurobiology, information system security and many others.

Specializations within this programme

Fundamental Radiophysics

Radiophysics and Electronics
