Radiophysics

National Research Lobachevsky State University of Nizhni Novgorod (Lobachevsky University)

Degree or qualification is awarded: Master's degree in Radiophysics

Language of study: **Russian**Mode of study: **full-time**Duration: **2 years**

Availability of free education: **yes** Price: **154 000 RUB per year**

Programme webpage at the university website: http://www.rf.unn.ru/courses/radiofizika/

Programme curator:

Studying at the radiophysics faculty of Lobachevsky University you will receive a classical education with a wide range of profiles from radio astronomy and laser physics to telecommunication technologies.

Modern radiophysics is an original scientific method for studying various phenomena of nature, a universal view of the world as a combination of vibrational and wave processes.

At present, specialists in radiophysics have the widest choice among the most relevant fields of science and science-intensive business, among which are as popular as wireless digital communications, nanostructure physics, neurobiology, information system security and many others.

Specializations within this programme

Specializations within this programme
Electromagnetic Waves in Media
Physical Electronics
Statistical Radiophysics
Nonlinear Oscillations and Waves
Quantum Radiophysics and Laser Physics
Information Processes and Systems
Acoustics
