This programme has been developed with the aim of training highly qualified modern specialists capable of efficient professional activity in governmental bodies, local authorities, state and municipal institutions with the usage of fundamental theoretical knowledge and innovation technologies.

Within the framework of this programme there are studied forms and methods of state and municipal management, state and municipal administration processes and processes of innovative development of territories.

Under the condition of successful mastering of the programme, graduates develop skills of improvement of current and generation of new methods of management at the federal, regional and local levels, skills of development and implementation of effective optimization methods for treatment of state tasks and implementation of state functions. At that, successful graduates from the programme acquire skills of applying management by objective methods while solving tasks at a local level.

Specializations within this programme

Regional and Municipal Government

Training in the field of regional government focuses on modern management techniques and latest methods of accomplishing national goals and objectives on the regional level. The programme facilitates interdisciplinary and practical learning, introduces students to the inner workings of law and economy, as well as regional management and entrepreneurship. Graduates of the programme undertake internships in government agencies and non-profit organizations.
