The academic Master's degree programme is aimed at training of highly qualified personnel for commercial and non-commercial organizations, state and municipal management bodies, financial institutions, small business, etc. able to run the financial sector under the conditions of challenges of modern globalized economy.

Specializations within this programme

Financial Monitoring

The programme is intended to prepare a new generation of professionals in the field of innovation, providing them with a combined knowledge of finance and credit, law and modern information technology.

Students will learn how to investigate illegal financial transactions, prevent money laundering and terrorism financing. Skilled in financial intelligence, graduates of the programme are in great demand in banks, financial institutions and government bodies. The relevance of this profession is growing every year due to the globalization of financial markets.

Financial Analytics and Consulting

The programme is focused on the study of functioning specifics of up-to-date financial markets during increased global economy turbulence, as well as credit organizations as their key players.

The profile disciplines are assigned to leading teachers of the Finance and Credit Department of Lobachevsky University who have research experience and publications in ranked national and international journals in the area of financial markets, and practicing specialists of financial institutions (banks, investing, leasing and insurance companies). Professional guidance over practice and research work of students with the application of Internet technologies in exchange and banking spheres is considered to be of great importance. Knowledge of up-to-date financial market instruments, as based on the understanding of their trend development in the era of globalization, provides for high demand for the programme graduates at the labour market.

Graduates of the programme work in commercial banks, investment and brokerage companies, leasing, insurance and factoring companies, supervisory and regulatory bodies (Bank of Russia), state and municipal management bodies, financial departments of companies, stock exchange trading platforms, etc.
