The aim of the program is to provide students with professional competences in metallurgy of nonferrous metals. On successful completion of the course students will have experience of research work and practical skills of solving metallurgy problems.

This International Semester Program “Nonferrous Metallurgy”, offered by School of Non-Ferrous Metals and Material Science at Siberian Federal University (SibFU), is a part of Master's Degree Program “Aluminium Technology”.

The course has been designed to provide theoretical knowledge required by professionals within the metallurgical industry and aluminium production technologies. Practical trainings and research work are conducted at the laboratories of Siberian Federal University and aluminium production company RUSAL.
