This educational program is for people with a higher medical education. It's aimed at training highly qualified specialists in the field of Healthcare Management and Public Healthcare for self-dependent work in healthcare agencies and facilities as well as private practice.

Program duration – two years.

The educational process is practically oriented and is intended to develop skills for efficient design of strategy for development of healthcare organizations and make informed decisions based on a comprehensive analysis of the situation and knowledge of current health problems.

Program staffing: doctors and candidates of sciences, leading specialists in medical organizations.

Features of implementation: clinics with high-tech equipment, use of interactive teaching technologies, use of multimedia equipment and internet communications.

Program graduates have the possibility to freely design their professional career, including continuing their studies for a Ph.D. degree.
