

Local networks in nuclear engineering

National Research Nuclear University MEPhI (Moscow Engineering Physics Institute)

Degree or qualification is awarded: **Certificate**

Language of study: **Russian, English**

Mode of study: **full-time**

Duration: **1 or 2 week**

Availability of free education: **no**

Price: **800 \$ or 1 000 \$**

Programme curator: **Sergey V. Kireev**

Tel.: **+7 (495) 788-56-99, ext. 9023**

E-mail: SVKireyev@mephi.ru

Brief description of the Program

On graduation students will possess knowledge in the field of basic architecture of local networks, architecture and Industrial Ethernet technology, methods of application and possibility of network equipment: cable system, network cards, concentrates, switchboards, methodology of analysis and assessment of the correct LAN structure

Specializations within this programme

Information technologies

Characteristics of the scope of professional activity of future graduates

Education program is meant for managers and specialists introducing modern methods of an information technologies at nuclear power plants
