

Nanosystems and nanostructures in nuclear technologies

National Research Nuclear University MEPhI (Moscow Engineering Physics Institute)

Degree or qualification is awarded: **Certificate**

Language of study: **Russian, English**

Mode of study: **full-time**

Duration: **1 or 2 week**

Availability of free education: **no**

Price: **800 \$ or 1 000 \$**

Programme curator: **Sergey V. Kireev**

Tel.: **+7 (495) 788-56-99, ext. 9023**

E-mail: SVKireyev@mephi.ru

Brief description of the Program

On graduation students will own knowledge in the field of physical conditions of formation and existence of nanostructural state, ways to obtain ultra disperse nanosystems and nanostructures, their physical and chemical properties, research methods of nanostructures, application problems related to nanomaterials and nanotechnologies application

Specializations within this programme

Applied and fundamental science

Characteristics of the scope of professional activity of future graduates

The program is intended for managers of top and middle level, as well as for specialists of enterprises in nuclear and other industries
