The Master's programme in Mathematics is an English-language double degree programme of HSE and the University of Passau (Germany), which foresees one year of study in Germany. The programme trains specialists for PhD programmes at high-ranking world universities and high-tech industries, where mathematical skills are essential.

The programme's lecturers are globally recognized researchers in the latest theories concerning dynamic systems. These international experts deliver courses and supervise students' research projects. Master's students get to carry out basic research at HSE's laboratories and engage in joint projects with leading Russian and international scholars.

Graduates are ready to continue their studies in mathematics at both Russian and foreign universities, as well as work in IT, insurance, analytics and other fields that require effective and in-depth scientific analysis and strategy.

## **Specializations within this programme**
