

# Modern Methods of Physicochemical Analysis. Theory and practice

Peoples' Friendship University of Russia

Degree or qualification is awarded: **Certificates (in English and Russian) or an Extended Professional Learning Certificate in Russian**

Language of study: **Russian, English**

Mode of study: **full-time**

Duration: **72 hours**

Availability of free education: **no**

Price: **900 \$**

Programme curator:

Tel.:

E-mail: [perspective@rudn.ru](mailto:perspective@rudn.ru)

## **Target audience:**

Professionals working in chemical R&D, industrial, and analytical laboratories, with a higher education in Chemistry or Pharmacy or related fields. Graduates and higher grade university or college students of the respective specializations universities are also fit for the program.

## **Aim of the program:**

to provide deep understanding of the modern methods of physico-chemical analysis regarding a variety of objects; to give practice in sample preparation and analytical method development; to explain the processing and interpretation of raw data

## **In simple terms, what will you learn?**

- we'll introduce the operation of modern analytical equipment to you
- we'll share the experience necessary for the optimal method(s) selection
- we'll summarize and extend your knowledge in the area of theoretical foundations of the methods and their application to various objects

## **Extra-curricular activities:**

sightseeing and museum excursions around Moscow and Moscow Region

## **The program fee includes:**

education, accommodation, meals (charged separately), excursions

## **Specializations within this programme**
