The organization of the educational process is carried out in accordance with the approved educational program, annually updated taking into account changes in legislation, the development of educational technologies, science, and the needs of employers. Students receive a basic education in economics in the first two courses. Professional knowledge is formed in the process of studying such disciplines as microeconomics, macroeconomics, econometrics, finance, firm economics, accounting, analysis and audit, world economy, industry market theory, institutional economics, etc. The choice of disciplines of the variable part, their necessity and sufficiency, is due to the requirements of the modern market for the formation of graduates' competencies (the ability to apply knowledge, skills, and personal qualities in accordance with the tasks of professional activity), taking into account the requests of employers. In the 3rd year of study, students can choose one of five modules consisting of 7 disciplines that implement the component of profiling according to the types of professional activities of the educational program. Throughout the entire period of study, students are immersed in project activities. The educational process provides for the widespread use of active learning methods.
