

# Biotechnology

Far Eastern Federal University

Degree or qualification is awarded: **Bachelor**

Language of study: **Russian, English**

Mode of study: **full-time**

Duration: **4 years**

Availability of free education: **yes**

Price: **200 000 rubles per year**

Programme curator: **Artem Grachev**

Tel.: **+74232652424 (#2206)**

E-mail: [interadmission@dvfu.ru](mailto:interadmission@dvfu.ru)

Bachelors - biotechnologists learn the methods of improving the quality, nutritional value and safety of both crops and products of animal origin forming the basis of raw materials used in the food industry. During the training they acquire the means of improvement of the raw material processing methods (natural flavors and colors, new processing additives, starter cultures, and new tools for waste management; environmentally friendly production processes, new tools for the conservation for food safety in the manufacturing process, and others.)

## **Programs:**

Food Biotechnology

Molecular Biotechnology:

The educational program "Molecular Biotechnology" is focused on research and technological activities that are fundamental for the development of high-tech production and scientific-technological potential in biotechnology, system biology, cell technology, molecular biotechnology, biotechnology of aquatic biological resources. Students will be able to work as employees of medical and pharmaceutical companies, advanced research centers and leading domestic and foreign universities.

## **Specializations within this programme**
