The educational program will be relevant to those who want to be among the first in Russia to work in the field of end-to-end digital technologies: virtual and augmented reality technologies; distributed registry systems (blockchain); big data; cloud technologies; robotics components; artificial intelligence and machine learning.

The training courses of the program are designed not only for the assimilation of knowledge, but also for the development of research skills and for the development of projects. Working in the projects of the program's partners, the student acquires creative skills to quickly adapt to new challenges arising in the process of developing the digital economy. Projects developed by students are examined by FEFU business partners, startup projects can be protected as a diploma.

Partner universities: MIPT, Lomonosov Moscow State University, HSE;

Partner companies: Samsung Electronics Rus Company LLC, institutes of the Far Eastern Branch of the Russian Academy of Sciences.
