

# Photonics of nanostructures

National Research Nuclear University MEPhI (Moscow Engineering Physics Institute)

Degree or qualification is awarded: **Master's degree**

Language of study: **Russian, English**

Mode of study: **full-time**

Duration: **2 years**

Availability of free education: **yes**

Price: **137 500 rubles per semester**

Programme webpage at the university website:

[http://eis.mephi.ru/AccGateway/index.aspx?report\\_url=/Accreditation/program\\_annotation\\_eng&report\\_param\\_pid=350&report\\_param\\_year=2019](http://eis.mephi.ru/AccGateway/index.aspx?report_url=/Accreditation/program_annotation_eng&report_param_pid=350&report_param_year=2019)

Programme curator: **Ivan S. Vasilievsky**

Tel.: **Contact name: Olga N. Petukhova, Phone number. +74957885699, ext. 8045.**

E-mail: [ONPetukhova@mephi.ru](mailto:ONPetukhova@mephi.ru)

**Department** of Condensed matter physics

**The area of professional activity of the graduates:** Research, development and technology, including photonics, which is a field of science and technology related to the use of light (or photon flux) in elements, devices and systems, in particular those based on nanostructures, in which optical signals are generated, amplified, modulated, propagated and detected, and optical informatics, which is the photonics area in which optical devices and technologies for the transmission, reception, processing, storage and display of information are created. The field of activity is also the development of the elemental base for optical and photonic instrumentation, optical inorganic and organic materials, including nanomaterials, metamaterials, hybrids and composites, and nanostructures based on these materials.

## **Objects of professional activity:**

- fundamental and applied research and development in the field of photonics and optoinformatics;
- elemental base, systems and technologies of integral, fiber and gradient optics, as well as micro-optics;
- elemental base, systems, materials, methods and technologies providing optical transmission, reception, processing, recording and storage of information;
- elemental base and systems of information transformation and display;
- elemental base and systems based on nanoscale structures;
- systems of optical and quantum computing, optical and quantum computers;
- optical systems of artificial intelligence;
- devices and computer photonics systems.

**Institutions for the practice and employment of graduates:** The Institution of Functional Nuclear Electronics NRNU MEPhI, The "Crystallography and Photonics" and other scientific centers, "Roselectronica JSC" and other industrial companies, the Institute of Microwave Semiconductor Electronics and other institutions of the Academy of Sciences.

## **Specializations within this programme**
