

Summer School on Metamaterials and Nanophotonics

National Research ITMO University

Language of study: **English**

Mode of study: **full-time**

Duration: **5 days**

Availability of free education: **no**

Price: **€ 280**

Programme webpage at the university website: <https://schools.itmo.ru/en/school/15/>

Programme curator: **Department of Physics and Engineering**

Tel.:

E-mail: summerschool@physics.itmo.ru

Duration: 5 days (July 6-10, 2020)

Outcome: ITMO official certificate, 3 ECTS credits

Deadline: March 31, 2020

Admission Requirements: Master's, PhD students and researchers

ITMO University invites you to take part in the [Summer School on Scattering Problems in Photonics](#) for PhD, Master students, engineers, postdocs and researchers.

The world's best experts in the field of photonics will give lectures grouped into a 5-day course on scattering problems in photonics. The course will start with the fundamentals and will cover the latest achievements as well. The practical classes will help you get the skills necessary for conducting your own scientific research in this area of physics.

The School is organized by the [Department of Physics and Engineering](#) of [ITMO University](#). This year, the School will be held within the scope of the XIX Electromagnetic and Light Scattering Conference [ELS-XIX](#).

More information about the summer school is available [here](#).
