Within this program much focus is given to the study of various aspects of international and national taxation systems, corporate tax management, as well as accounting, taxation and management record. Modern labor market is in demand for specialists with deep knowledge in three areas: accounting, corporate taxation and financial analysis of economic phenomena in business units. The program is relevant and up-to-date due to the processes of automation of accounting and analysis processes in the era of digital economy. Therefore, we equip our students with broad economic knowledge and practical skills to work with modern IT-technologies and systems.

You will be able to work as:

- accountant;
- microfinance specialist;
- internal finance specialist (internal finance controller);
- specialist in financial counselling;
- internal accountant;
- valuation services specialist.
