

State regulation of safety in the use of atomic energy

National Research Nuclear University MEPhI (Moscow Engineering Physics Institute)

Degree or qualification is awarded: **Master's Degree**

Language of study: **Russian**

Mode of study: **full-time**

Duration: **2 years**

Availability of free education: **no**

Price: **207 610 рублей в семестр**

Programme curator: **Georgy V. Tikhomirov**

Tel.: **Petuhova Olga Nilolaevna +74957885699, доб. 8045**

E-mail: ONPetukhova@mephi.ru

The purpose and form of the educational program

The purpose of the educational program is the professional training of highly qualified specialists in the field of regulation and safety of nuclear facilities and nuclear legacy facilities, with special knowledge and practical skills in the field of substantiation and safety of these facilities.

The educational program is implemented by NRNU MEPhI in a network form jointly with The Federal Service for Ecological, Technological and Nuclear Supervision (Rostekhnadzor) and The Scientific and Engineering Centre for Nuclear and Radiation Safety (SEC NRS).

The program aims to implement the Fundamentals of state policy in the field of nuclear and radiation safety of the Russian Federation in terms of increasing the personnel potential of organizations engaged in the field of atomic energy use, as well as to assist in the implementation of the international obligations of the Russian Federation on the formation of a safety regulatory infrastructure in countries that advocate customers of the construction of nuclear power plants for Russian projects, in terms of the formation and development of competencies of persons scrap national safety authorities in atomic energy use and their organizations, the scientific and technical support.

Specializations within this programme
