The aim of International Economics degree program is methodological support of implementing the Federal State Educational Standards of Higher Education in Economics, taking into account the mission of Siberian Federal University to provide comprehensive multi-level and innovative education for training highly qualified economists with a high level of competence in advanced applied analysis of economic processes and phenomena, as well as deep analytical and theoretical research activities.

Program tasks:

- to train bachelor students on the basis of social expectations of the community for personal and professional competencies that determine their readiness for independent living and productive professional engagement in today's society;
- to train multi-tasker economics who are capable of analysing economic processes using the most advanced methods, as well as having the skills to use it in any industry of economy through analytical, calculation-economic and research work at the level of the modern global requirements;
- to form in-depth foreign-language competencies of economic nature to be used in practice and research;
- to provide enhanced fundamental training of bachelor students in the field of economic and mathematical methods and their application.

Competitive advantages: competencies generated as a result of mastering the programs allow the graduate to build their professional trajectory in any area of economic activities, including international economic relations of any level.

Employment: A graduate of the program may hold positions of any economic profile, including those in organisations and subdivisions engaged in international cooperation.
