

Automation of Technological Processes and Productions

South Ural State University

Degree or qualification is awarded: **Master's degree**

Language of study: **Russian**

Mode of study: **full-time**

Duration: **2 years**

Availability of free education: **no**

Price: **161 600 rubles**

Programme webpage at the university website:

Programme curator: **Lev Kazarinov**

Tel.: **+7(351)267-94-21**

E-mail: eeecs@susu.ru

This programme is focused on training of Master's degree students in the field of control automation based on the use of modern computer technology in various industries and urban economy. The educational process is carried out in world-class laboratories equipped with the cutting-edge computer technology and equipment by widely known companies in the field of automation: Siemens, Omron, Schneider Electric, and Endress+Hauser.

The laboratories are comprehensively equipped with the technical means of all levels of automated process control system: the field level of sensors and actuators, controller level, industrial data transmission networks, and the level of operational control workstations.

Specializations within this programme

Automation of Technological Processes and Production

This programme is focused on training of Master's degree students in the field of control automation based on the use of modern computer technology in various industries and urban economy. The educational process is carried out in world-class laboratories equipped with the cutting-edge computer technology and equipment by widely known companies in the field of automation: Siemens, Omron, Schneider Electric, and Endress+Hauser.

The laboratories are comprehensively equipped with the technical means of all levels of automated process control system: the field level of sensors and actuators, controller level, industrial data transmission networks, and the level of operational control workstations.
