

# Educational technology and instructional design

## Immanuel Kant Baltic Federal University

Degree or qualification is awarded: **Bachelor**

Language of study: **Russian**

Mode of study: **extramural**

Duration: **4 years**

Availability of free education: **no**

Price: **1 405 USD per year**

This course aims to introduce you to different approaches in educational methodology. That will allow you to design and create new educational products and plan activities for educational organizations. You will gain knowledge in designing new educational programs, as well as monitoring and implementing the latest developments in the field of education.

Practising teachers will share their experiences in the field and the secrets of the profession. The internship will take place in Kaliningrad-based educational institutions. Practical tasks and mock exercises will help you prepare for future employment. Participating in professional competitions will allow you to improve your networking skills and plan your professional development. Graduates of this course will be able to plan and assess their lives and professional prospects and build their lives on a projection basis, as well as predict the changes in the field of education and its consequences.
