

# Experimental philosophy and neurosciences

Immanuel Kant Baltic Federal University

Language of study: **Russian**

Mode of study: **full-time**

Duration: **2 years**

Availability of free education: **no**

Price: **2 270 USD per year**

During the course of studies, you will take a comprehensive approach to the study of philosophical problems of consciousness, the nature of morality, taking the data of neuroscience and evolutionary biology into account. That will allow you to apply neurobiological concepts to traditional philosophical questions and categories in their modern interpretation. The acquired skills of information analysis and context understanding, together with fundamental knowledge in the field of the nature of consciousness, its origin and genesis, the structure of the brain, will allow you to explore the secrets of thinking, memory, decision-making and other properties and processes of the psyche from both the philosophical and neurophysiological points of view.

## Specializations within this programme
