Specializations within this programme

Digital Manufacturing

Program description

The program is aimed at training specialists who are capable of solving fundamental and applied technological tasks in the creation of new devices and systems using modern digital technologies and equipment, and have a good command of technologies for digital modeling and design of both products and devices and manufacturing processes at large. Students are actively involved in independent and project work under the guidance of ITMO University mentors and specialists from partner companies. In the course of their training, students acquire hands-on experience of working on cutting-edge equipment, as well as skills of using robotized and automated complexes.
