In-depth training in English and the gaining of knowledge in the field of digital technology and law help to master the sphere of innovation ideas to actualize the life of the society, and to find job in business, big public and private corporations.

Jurisprudence

The development and implementation of the educational programme is aimed at the multi-aspect training of lawyers focused on modern legal practice, improvement of the professional skills, formation of practical skills in accordance with the general goals of the formation of the human resources in Russia and the Chelyabinsk Region as an element of the state educational strategy of our country.

The development and implementation of the educational programme is encouraged by the necessity to train competitive and adaptive professional lawyers in order to solve the problems of innovation development of the society; improvement of the professional and cultural level of the Russian citizens; implementation of fundamental and applied research and development.

The educational programme in the major of "Jurisprudence" takes into account the best traditions of the Russian education. A harmonious combination of classical teaching methods and the latest innovative approaches helps to create an efficient system for mastering theoretical and practical knowledge. The educational process is as close to future practical activities as possible.

The implementation of the educational programme is provided by academic and teaching staff with basic education corresponding to the profile of the courses taught, academic degree or experience in the relevant professional field.

Jurisprudence (State Legal, Criminal and Civil Law)

The curriculum covers legal courses, the knowledge of which is in demand in the implementation of professional occupation in both public law (state) and private law (commercial) spheres. The main emphasis in training is the formation of the knowledge and skills related to ensuring strict observance of the law in the implementation of rulemaking and the requirements of the provisions of law, ensuring the rights, freedoms and legitimate interests of the citizens and organisations.

Students study all the main branches of law (constitutional, civil, criminal, administrative, etc.) and can interpret and apply various legal acts. Special attention is paid to the fundamentals of the activities of state and local authorities, the peculiarities of law-making, ensuring the rights, freedoms and legitimate interests of the citizens and organisations, the control and supervision of the state.

The implementation of the educational programme is provided by academic and teaching staff with basic education corresponding to the specialization of the courses taught, academic degree or experience in the relevant professional field.

The main goal of the educational programme is to train qualified lawyers with competencies relevant to working in the legal services of organisations and enterprises, in court, law enforcement agencies, and defence attorneys.
