

Applied Computer Science in Energy Saving

National University of Science and Technology MISIS

Language of study: **Russian**

Mode of study: **full-time**

Duration: **2 years**

Availability of free education: **yes**

Price: **234 000 rubles\per year**

Programme curator: **Alexander Travin**

Tel.: **+7 495 955-01-55**

E-mail: aletrav@mail.ru

The program covers IT and instrumentation for production and metering process safety as applied to industrial technologies.

The program develops skills related to microprocessor programming, measuring equipment, Internet technologies, computer networks, and intellectual systems.

Specializations within this programme

Application and implementation of electric power saving methods, IT for power supply monitoring and management, energy-efficient equipment selection, use of related mathematical support and software applications.
