

Material Structural Analysis and Diagnostics

National University of Science and Technology MISIS

Language of study: **Russian**

Mode of study:

Duration: **2 years**

Availability of free education: **yes**

Price: **245 400 rubles/per year**

Programme curator: **Alexander Savchenko**

Tel.: **+7 495 955-01-33**

E-mail: algsav@gmail.com

The program addresses skills for development, investigation, and diagnostics of organic and inorganic materials of various designation by means of diffraction, electronic microscopy and resonance-based methods; material generation, shape and structure formation processes; transformations at the manufacturing, treatment and operation stages; manufacturing of materials, semi-finished products, parts and items, and their quality management in various industries.

Specializations within this programme

Expert on R&D and design in materials science and materials technology
